> Senior Product Designer / Product Design Lead <

PROFESSIONAL SUMMARY

- Product/UX Designer with **8+ years** of experience turning complex workflows and ambiguous problems into clear, scalable digital products across B2B SaaS, fintech, cybersecurity, and technical environments.
- Led SaaS (**dility.io**) **from 0→1**, combining product strategy, user research, workflow design, prototyping, MVP development, and engineering collaboration to shape a new B2B SaaS product.
- Reduced workshop setup time from approximately **60 minutes to 10 minutes** by redesigning a fragmented operational workflow into a structured digital product experience.
- Strong experience establishing product-design processes, translating research into product decisions, building reusable design patterns, and connecting user needs, business goals, and technical feasibility.
- Comfortable working in unfamiliar technical domains and simplifying complex systems for expert users.

WORK EXPERIENCE

User Experience Consultant | Independent | 2022–Present

UX consulting and product strategy work focused on complex digital products, workflows, AI-assisted systems, and human-centered product decisions.

- Design UX strategies, audits, workflows, prototypes, and product recommendations for complex digital and technical product environments.
- Build AI-assisted workflows for research synthesis, ideation, evaluation, documentation, and structured product decision-making.
- Partner with founders, product teams, and technical contributors to translate ambiguous requirements into clear product direction, user flows, and scalable design solutions.
- ...

Co-Founder & Product / UX Strategy Lead | dility.io | 2022–2025

Early-stage B2B SaaS platform designed to simplify remote workshop preparation, collaboration, participant onboarding, and post-workshop validation.

- Led **0→1 product discovery and design**, from user research and workflow analysis through product strategy, information architecture, prototyping, MVP direction, and validation.
- Reduced workshop setup time from approximately **60 minutes to 10 minutes** by simplifying fragmented preparation workflows and creating reusable product patterns.
- Balanced user needs, business strategy, and technical feasibility while collaborating with engineering and other contributors to prioritize product direction and implementation.
- Established reusable UX patterns and processes to create consistency across the emerging product experience.

Sr. UX/UI Designer

TeamWorx Security | May 2025–July 2025

Cybersecurity and observability dashboard project focused on risk monitoring, alert prioritization, technical workflows, and decision support for security teams.

- Conducted UX audit and modernization work for a complex technical dashboard used to support risk-analysis workflows.
- Improved information hierarchy, cognitive-load management, alert prioritization, and decision-support patterns for technical users.
- Developed reusable UI and design-system foundations to support consistency and scalability across complex product surfaces.
- ...

UX/UI Designer, Digital Products

Verivox | 2020–2022

A leading German comparison platform for energy, telecom, insurance, loans, and financial products, supporting digital comparison and switching experiences for **8M+ customers** across high-trust consumer decision journeys.

- Improved user task **success by 20%**, engagement and design consistency through UX/UI improvements, responsive product design, and scalable design standards.
- Improved form **submissions by 15%** by redesigning trust and security communication in a regulated financial product workflow.
- Designed user flows, wireframes, high-fidelity prototypes, and responsive product improvements while collaborating with product, engineering, legal, business, and leadership stakeholders.
- ...

UX Designer, Human-Machine Interaction

Schindler Creations / Consulter | 2017–2020

Industrial and product-design environment serving technical and manufacturing-focused clients, including work connected to **Doppelmayr and DMG MORI**.

- Unified **200+ icons** to improve interface clarity, visual consistency, and usability across industrial interface projects.
- **Improved** intuitive interface quality **by 15%** through UX, visual design, prototyping, and human-machine interaction improvements.
- Translated technical product information, client requirements, brand needs, and business goals into clear interface and visual design solutions.
- ...

HIGHEST EDUCATION

Master of Arts, Product Design

Coburg University of Applied Sciences and Arts | 2014–2016

LATEST CERTIFICATION

Google Data Analytics Certificate

Google | April 2026

SKILLS

Product & UX: Product Strategy, 0→1 Product Design, UX Strategy, UX Research, User Interviews, Usability Testing, Workflow Analysis, Information Architecture, Journey Mapping, Interaction Design, Prototyping, Design Systems, Design Operations, Heuristic Evaluation

Complex Systems: Enterprise UX, B2B SaaS, Technical Workflows, Dashboard UX, Data-Heavy Interfaces, Decision Support, Cognitive Load Reduction, Permissions & Role-Based Workflows, Complex Information Architecture

Collaboration: Product Strategy, Engineering Collaboration, Stakeholder Alignment, Cross-Functional Leadership, Design Critique, Workshop Facilitation, Agile Product Development, Mentoring

Tools: Figma, FigJam, Miro, Sketch, Adobe Creative Suite, Jira, Confluence, ChatGPT, Claude

Technical: TypeScript, React, Next.js, Supabase, AI-Assisted Workflows, Data-Informed UX
